

Merlinus Anglicus Junior:

OR THE

STARRY MESSENGER

For the Year of our Redemption, 1697.

And from the Creation, according to Sacred Writ, 5646.

Being the First after Leap-Year.

Wherein is contained, (1) *Astronomical* and *Meteorological Observations*. (2) The State of the Year, deduced according to ART, from the Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Planets. (3) The *Rising* and *Setting* of the Sun, Moon and Stars: Also her *Southing*; Together with many usefull Tables pertinent for such a Work, Accommodated to the Meridian of London, which lies in the Latitude of 51 deg. 32 min. North, but may indifferently serve (without sensible Error) for any other part of Great Britain. To which is added *Monthly Observations* and *Astrological Predictions* (or *Conjectures*) upon the whole Year, &c. Also an *Ephemeris* of the *Diurnal Motions* and *Aspects* of the Planets, &c. the like (in all particulars) not extant.

By HENRY COLEY, Teacher of the *Mathematics*, and the *Celestial Science*, in Baldwin's Garden.

The Six and Twentieth Impression.

Alius alio plura invenire potest, Nemo omnia.

That is, *what is, was before us, and will be when we are no more: War follows Peace, and Peace War, as Summer follows Winter.*

Oxburne.

LONDON,

Printed by John Hepsfall, for the Company of Stationers 1697.

The *Julian* or Old Ac- } 1697 } The *Gregorian* or New
count used in *England*. } Style used Beyond Sea.

The Laws do Mens unjust Desires confine,
Maintain our Pesce, distinguish mine and thine ;
They're Physick for the Body Politick,
Without which ev'ry Limb would soon be sick ;
Yet tamper not too much, 'tis better lose
Ones Right sometimes, than costly Suits to choose :
Use Lawyers for need, and study Quiet,
Hearts, that makes a Medicine dayly Dyett.

Some Men of Zeal condemn all *Usury*,
 But that we think too great Severity;
 Without it *Trade* would languish, and the Poor
 Be more necessitated than before.
 Excess makes Vice; — on Interest you may lend,
 But barr *Extortion* whilst you seem a Friend.
 And you that borrow, mind to keep your Day,
 Else you not only *Use* but *Cost* must pay.

King William and Queen Mary Crown'd April 2. 1689.

Began or Proclaim'd Feb. 12. 1688.

Great are the Monarchs of our *English* Throne,
 What Kingdom can a Race so glorious own?
 Lo here's a Catalogue of Royal Race;
 In none you can more marks of Valour trace;
 Nor find a Prince amongst them all, possess
 A greater Share of nobler Happiness
 Than he, in greatest Dangers takes our Parts,
 And thereby makes true Subjects, Loyal Hearts.
 May *William* ever Great and Glorious be,
 And daily blest with Fame and Victory.

In the years 1691 and 1692, I presented the intelligent Reader with a rational Discourse of the Tydes, from Mr. *Isaac Newtons* late Book (as 'twas published by Mr. *Halley*) for the satisfaction of those ingenious Enquirers, that perhaps never saw it; and here I proceed on from the place I broke off, viz. whereas in *June* and *December* the *Spring Tydes* are

1 9 A 49	5 M 2	☐	or.	oc	8	△	We live in dayly expectation of a better understanding of the intentions and designs of the most great and active Spirits of <i>Europe</i> . Here is not much talk of warlike Actions going forward, but rather many serious Negotiations and Conventions in the Western parts of the <i>Macrocosm</i> , to consult of divers weighty matters both in Church and State, and to this purpose several Ambassadors are employed. Now if the Stars fail me not, our English Nation remains in great Splendor, and the King of Great <i>Britain</i> hath many assured Testimonies of <i>Tranquility</i> and <i>Welfare</i> . At the beginning hereof some great Female Personage loses ground, but at the end the may expect comfort.

1	12	A	4	6	M	34	△	*	△	8	□	<i>April should prove a</i> very active (if not violent) Month in some respects, for there are many very considerable Aspects therein: some Quarrels, and very hot Contests may now appear, and 'tis strange if some do not lose their lives about the thing called Honour. New Leagues, Articles, Counsels now in Prosecution take up much time before they are brought to a final determination. Notable Rumors, & strange Reports with Grumbling and Repining in many places of Europe, and several Male-contented Agents secretly endeavour to promote the same. But we hope Providence may frustrate their designs, and in the end totally spoil their endeavours; namely some Persons who have been fraudulent Actors in their Trusts repos'd in them, are now disgrac'd and laid aside.

1	12	10	7	M	1	△			☐	or.	oc.	△	Here appears yet great hopes of the confirmation & firm settlement of a happy Peace in most parts of <i>Europe</i> , yet the Nobility and Gentry of many Countries therein continue very uneasie and dissatisfied. Let those that covet more than Providence hath assigned them, sit down with loss and repent their Folly. There are now superlative Actions upon the Stage, and various reports arrive from most parts of Christendom. <i>Jove</i> in the <i>Celestial</i> Balance, and the Planet <i>Saturn</i> in <i>Aquary</i> (tho' <i>Retrograde</i>) yet in Trine to the <i>Sun</i> , gives great hopes that those many consultations and active endeavours now depending may produce their desired effects.

June hath xxx days.

and Reflux of the Sea would for some time continue; this conservation of the Motion diminishes the difference that otherwise would be between the two Tydes, and is the reason why the highest Spring Tydes are not on the New and Full Moons, nor the Neaps on the Quarters; but generally they are the Third Tydes after them, and sometimes later.

3697.

July high noon days.

all these things would regularly come to pass, if the whole Earth were covered with Sea very deep; But by reason of the shallowness of some places, and the narrowness of the Straights, by which the Tydes are in many places propagated, there is a great Diversity in the effect, and not to be accounted for without an exact knowledge of all the circumstances of the place, as the situation of the Land.

Learn that the Deceitful of
 Stars and then
 You'll Act like Petty Gods, not
 Men.
 The Actions of this Month
 equires the Wisdom and
 endeavours of the most pru-
 dent persons. Publick Ne-
 gotiations seem at present
 at a stand, the vulgar Man
 complains he is impove-
 rish'd, and some of the
 Richer sort must be con-
 tent to sit down with their
 Losses, and other Casual
 Accidents which about this
 time may hap. en. We have
 here a most harmful Oppo-
 sition of the Sun and Sa-
 turn, which sometimes bodes
 contradictions as well as
 Oppositions to Kings, Prin-
 ces, Magistrates, &c. And
 how the Inferior sort should
 be apt to dislike the Ac-
 tions of their Superiors, but
 better things may be hoped
 for. There are Count's De-
 cern'd by Providence be-
 yond which the most Am-
 bitious Prince cannot go.

1697.

August, both ~~sun~~ days.

And the breadth and depth of the Channels by which the Tyde flows; for a very slow and imperceptible motion of the whole Body of Water, where it is (for Example) twelve miles deep will suffice to raise its Surface ten, or twelve feet in a Tydes time; whereas if the same quantity of Water were to be conveyed upon a Channel of forty Fathoms deep, it would require a great stream to eff. & it;

Sed quæ Inpra Nos Nihil ad Nos.

Heavens prevent the probable mischiefs may be produc'd this Month, for here is abundance of fraud and Dissimulation, perceded, the Quarrel of Saturn and Mars never produces any thing that's good, and now we may expect a strange discovery of many Treacherous designs, I hope no more Damnable Plots. In fine the month produceth nothing (or very little) of good, but contention amongst Graces, much Robbing upon the High-Ways, and to be feared very difficult Transactions in agitation, and divers persons now in great danger. *Caveo.*

There's nothing so various Scenes obtrude, And all the World's but a Vicissitude.

B 3 Sep

27 September 1692

D. 10 M. 10

New Moon the 5 day at 10 in the morning.
 First Quarter the 13 day at 14 in the morn.
 Full moon the 20 day at 10 in the Morning.
 Last Quarter the 27 day at 2 in the morn.
 The moon, out of the Laws of Pure Conjunction,
 The sun is Cloudy will Clear up again.

Opus Artificum probat.
 We are (all the while
 feared) under the male
 influence of Saturn and Mars
 and we have observed
 some years past many
 effects to follow such kind
 of Configurations in many
 places, as Murders, Injur-
 rections, with several
 proaching of the Magistracy;
 arising chiefly from
 disaffected, Repining
 of People, but since here
 are several Benevolent
 Configurations now oper-
 ing also, we hope upon
 this Lyll will be mitigated
 but doubtless it will prove
 a Month of high and weighty
 Consultations.
 God grant they end well
His Justice to Revenge the
offences
That's done to Injur'd In-
nocence;
Not Favouring the
find,
Who unprovok'd has been
unkind.

52

1697.

October hath seven days.

And it would yet be more between Dover and Calis, if the Tyde coming about the Island from the North did not check it. And this force being once impressed upon the water, continues to carry it about the level of the ordinary height of the Ocean, particularly where the water meets under Obsterus at St. Malo's, and where it enters into a long Channel, which

The face of things do now appear in moderate good order in general, and I hope they will continue. For the Heavens are in a Peaceable posture, and why should not the minds of Men? Now there are some persons act with too much inability, but I have great hopes that the whole world produces nothing but Tranquillity and Quietude in general, yet most persons are for Novelty, and the Factions or Phantastic Spirits are now dispersed, and thus

When Men do tempt their Stars beyond their Light, They leave them as a mark of Fortune's Spight.

Let Virtue be encouraged and Vice corrected. There are a sort of Wolves and Monsters of Humane Society, which know too well how to improve their art of Destruction.

November

1697.

November hath 30 days.

Which running far into the Land, grows very streight at the extremity as it is in the Severn-Sea at Chepstow and Bristol the Shaleness of the Sea, and the Intercurrent Continents are the Reason that in the open Ocean, the time of High Water is not the Moon's Appulse to the Meridian, but always some hours after it, as is observed upon all the West Coast of Europe, and Syria, from Ireland

12. all which a South-West Moon makes High-water, and the Tame is reported to be on the West side of America. But it would be endless to account for all those particularities, which are Consequences of this Hypothesis, as why Lakes, such as the Caspian Sea, and Mediterranean-Sea, such as the Black-Sea, the Swegit, and Baltrick have no sensible Tides. For Lakes have no Communication with the Ocean, and can neither increase or diminish Water.

31	6 22	8 3	0 0	9 32	0 0	10 5

If By this Table you would have the Moon's Southing for every day, 'tis but adding the half difference between any two of these Southings that lie together to the lesser Southing. So the half difference between the first and third of March is 45 m. which added to 2 h. 2 m. against the first day, is 2 h. 47 m. for the Moon's Southing the 2d. day in the morning &c. &c. &c.

The Dominion of the Moon in MAN'S Body, passing under the
Twelve Zodiacal Constellations.

Upon the Twelve Signs.

Manil. Libr. 1. cap. 4.

*Aurato Princeps Aries in vellere fulgens,
Respicit admirans adversum surgere Taurum, &c.*

THE Princely Ramme, clad in his Golden-wool,
Looks back admiring to behold the Bull
Against him Rise, who with a chearful face
Calls to the Twynns, to bid them mend their Pace;
The Crabbe these follows, and the Lyon than;
Next the Celestial-Maid, (not known by Man :)
Libra comes after, who (lest time should faile)
Weighs out the Days and Nights in equal Scale,
And calls the Scorpion on, who in his Traine,
Bears a bright fulgent Star, at which (in vaine)
The Centaur (with his string drawn to his ear)
Aims his keen shaft : the Goat doth next appear,
That's Capricornus call'd, who oft-times lowres,
Because to quench his Star, Aquarius powres
His Eaver forth : next after him be plac'd
Pisces, which of the Twelve Signs are the last.

*Since the Creation, and since Noah's Flood,
By Authors (true) was ne'r well understood;
For their Accounts do so much disagree,
They cannot well be reconcil'd by me:

vade England. 1

COLEY, 1697. *His Astrological Observations.*

THE mislique Ring of Old did Represent
Heavens Endless motion, and Times sweet consent,
This was that Reverend Ring, did Conjugate;
Dance Vesta to her Star enamell'd Mate,
So sweetly Ran those Milky Streams of old,
When first the New-born World did shine with Gold.
“ And now you're welcome (friends) to one year more,
“ Our Plotting year is past and gone before;
“ Here, to make way for this, that now comes In,
“ As Old years pass, Let's now New lives begin.

I. That the Planets and Stars have Influence, and Signification
over all Actions, Generation, Individual Fate, and Casual
Necessity.

AND thus it appeareth as well by the Testimony of Sacred
Cabal, as Philosophical Proofs, that by this Constant and
Vast Sphere and Fountain of Fire, the Sun, with the moveable
Orbs of the Planets and Stars, as mediate and Second Causes,
is influenced all variety of Action, especially Propagation, In-
dividual Fates, Events and Accidents, happening within and
upon the system of every Elemental Orb.

For as the Active heat of the Sun, extending It self to every
one of them, as their Common Disposer, for the Admission
of the Subtler Instance (as It may be Termed;) so all of them
communicating one anothers Refracted Sun-shine, do mutually
Impress each other as well with qualified Virtue from their se-
veral Constitutions, as Figurative and Dimensive, substantially
from their Postures, and thereby they all become Influential.

And seeing they are the Immediate-Cause of all things happen-
ing within this Sphere of our Inhabitation, they must by as good
Reason be presignificant, and give show and signification of so
much, as by their habitude they may be disposed to Effect.
But their hability suiting all sorts of efficiency, their Significati-
on as largely extendeth It self over all and every Event, Effect
and Accident, that has been, is and shall be, In all, or any part
of the World. And hence appeareth the lawful Use of Astro-
logy, (maugre all Brain-sick Cavillers) for præcursing Causes as
rationally Arguing subsequent Effects, as any of the other Sci-
ences.

And thus seeing 'tis apparent, and concluded, that they are
not only præsignificant, but farther, what they do præsignifie, and
Influence;

COLEY, 1697. His *Astrological Observations*

Insinuation; It will not be amiss to express how their Signification may be gathered, argued, and known, briefly thus: As all Impression is made by *Configuration*, and lineal Radiation, which where they make greatest Concurrence, is where there is greatest Union; and Union is by *Conjunction* or *Opposition* of Beams, and such a Position is not always in one place, so the Event according to the point of such Contingence, is inconsistent, which may produce continual Change and Interchange of Influences; — as we may see by Experience.

His *Astrological Observations upon the Quarterly Ingresses of the Sun*, this year, 1697. and first of the Sun in Capricorn, 1696.
December 10. 6 h. 15 pm. \odot \hbar \circ . \square \vee \circ , \circ ad \odot \hbar .
 \circ ad \star or.

IN this Ingress, I find about 4 degrees of Aries upon the Midheaven, and the latter degrees of Cancer Ascending. Venus is in *Conjunction* with Saturn; Jove in *Quartile* to Mars, and Mars hasting to the Body of Saturn; a Position of very cross Import, if it be but well considered, and bodes nothing good to Mankind: God preserve us from farther Plottings or Innovations. From these *Configurations*, we may expect more then usual Consultations at this Season, I hope to the satisfaction of the whole Nation, Tho' (as one truly says) by a word we may wound a Thousand, and at one Blow, Assassinate the Honour of a Nation; 'tis to no purpose to complain and rave against the Times. And we cannot Judge small or trivial Matters now depending upon this unhappy *Conjunction* of the *Infernales*, nor do I desire to abound in my own Sense, or take so much liberty to be Dogmatical. This Month of December is attended with very notable *Configurations*, as aforesaid, and from thence we may expect as quick and significant Effects (tho' the Season admits of little or no Action.) This Quarter I conclude will produce more than ordinary Transactions; and amongst the rest, we are menaced with a sickly, discontented Season, some Bickerings appear amongst Great Persons, and thus we see Power and Majesty can Brook no Equals: We have many strange Reports are now somented, here are material Accidents Grounded upon precedent and subsequent *Configurations* of malignant Nature, here's no true Satisfaction in this Region of Vicissitude, since the Spirit of Contradiction appears in the Actions of some Persons well known in our Nation; much complaint for Trade, a scarcity of Money, strange Aspersions

COLEY, 1697. *His Astrological Observations.*
and Reflections Banded up and down, and many malecontent-
ed Persons endeavour to promote Tumults and Disorder.

We are carefully to consider the several *Conjunctions, Oppositions,* and *Quadratures* of the whole Year, for the divers and
sundry *Transmutation* thereof, are occasioned thereby; or
from their powerful Influences: and there is a certain Art
truly known to few men who doth so Illustrate the Mind, that
a Man may suddenly be cleared from the Fogs of Ignorance,
and brought to the Light of Wisdom and Learning in their
Matters, and there are not many Professors (tis to be feared)
so qualified: However, there are but few that Question the
late Famous Mr. *William Lilly*, our English *Martin*, who has
left these following Lines upon Record, viz. Thus much I say,
and say it again and once more, He is not alive of any Nation
whatsoever, that shall have his full Career in Vengeance upon
the English Nation, without his own proper Destruction, and
perhaps of the whole Family.

The Times are drawing on, and do draw near, if the Wis-
dom of the Ancients discerned any thing, or the more Cur-
ious Knowledge of the now Surviving have any Prescience;
when *England* shall Miraculously, and as it were in a Moment,
be Disburthen'd of all her Oppressions and Oppressors: *Eng-
land, England, England*, thou shalt Flourish again, and again,
thou and thy Impoverish'd *Cities*, and *Merchants*, and of this
be assured; and when the fulness of Time comes, or near to
the Year, 1700, Thou shalt have a principal Hand with thy
Sister of *Scotland*, and some *Northern* People, in Performing
and Concluding the mightiest Actions *Europe* ever beheld since
the Birth of our Saviour. — I am sorry we must Suffer
yet a while; but let us not despair, we that are true *English*,
for look how many single Years we are Afflicted, so many
Scores of Years I know shall be added unto us for Restoration
of our Misfortunes, &c. The Zeal I owe to my Country, had
almost made me forget that *Martianus Junior* must not Prophe-
sie, but Paraphrase, and rest contented to be stiled *William
Lilly*. Thus you will find it Written in his Prophecie of the
White King and *Dreadful-Deadman*, Publish'd 1644. And far-
ther in his *Anglicus*, 1656. he writes thus, which I take to be
significant, and the rather, because we are so near the Year
1700. The more we look into the *History* of *Nature*, or en-
quire into the Secrets of the *Stars*, the more we are induc'd
to

COLEY, 1697. *His Astrological Observations.*

to believe, that the time draws near, when as miraculous a Change in Kingdoms and Nations, shall manifest itself in Europe amongst the Northern and Northwest People thereof, as ever did in any other part of the World, since the Universal Deluge in Noah's time; and these so great and formidable Actions are to be perform'd by the Achievements at first, of an Excellent single Person, or Man (Instrumentally I mean) he being Ordained of God for that purpose, to do Wonders wherever he shall come, both in Church and State; and hereof be pleased to take Notice, that as the first Emperor of this World was of the Assyrians, and began, and was Seated in the East part thereof, That of the Persians and Greeks in the South, That of the Romans in the West; so doubtless the Northern parts of the World in due time (perhaps in few years) shall bring forth a Man, or Men, who shall erect or advance to him or themselves, an Empire, Dominion, or Principality, of as great Majesty and Largeness, if not far exceeding any of the former we have mentioned; of whose Might and Greatness, that new Star in Cassiopeia 1572, was doubtless the fore-runner or Prodromus.

That little obscure Comet in 1652, perhaps may shew his Birth or first Growth unto Greariness, &c. In short, we believe a very great and mighty Monarchy shall arise out of the North, yea out of the North parts of Europe, to which purpose the Sybil Tiburtina Prophecies, viz. A Star shall arise in Europe towards the great House of the North, whose Beams shall unexpectedly Enlighten the whole World, &c. — Farther saith he, we proceed and say, it is more then Probable the French Nation will not be always so Victorious or Rampant, as of late Years they have been; nay we are assured they will not, (Execution is preparing for France) these being Auspicious, and also Disastrous Years and Times, as well in the Government of Empires, Monarchies, or Kingdoms, as in the Reigns, or annual Rulings of Princes, or Lives of Kings, or Persons of private Fortunes, of which we in England have some years since had the most remarkable Experience of any former Age, in the Life, Reign, and Death of CHARLES the First, that most unfortunate King; whose proper Sins could not, nor did exceed the number of other Mens, therefore he Perish'd (as we may say) by that peculiar Fate of England, (God so permitting) or the general Fortune of those Three Nations or

COLEY, 1697. His Astrological Observations.

People he Govern'd, but from 1625 to 1641, he enjoy'd as much Earthly Felicity as any Prince in Europe; but the Revolution of Time, and I may say, his and our Sins, chang'd the Honey into Gall and Bitterness: And so Almighty God, having Decreed it; All things have a time to be Born, to Encrease, to Die, and to be Extinguish'd. Thus much from this good Man who is now long since in his Grave, he had as good a Talent this way, as any Person in the last Age; and such kind of Predictions as these are not to be forgotten, since the time limited is so nearly approaching, and many of us now living may perhaps see them more or less verified, if Divine Providence contradict not.

III. Of the Spring Quarter, or Sun in Aries, which this year Commences, March the 9th. 8 h. 32 Pm. * h 3. * 0
h. 2. 6 h. 44 Δ 4, &c.

IN this Position I find about 6 degr. of *Lep* upon the *Mid* heaven, with 27 degr. of the *Celestial*-Ballance ascending, and *Jove* just arising therein. *Mars* and *Saturn* salute by a *Sextile*, the *Sun* and *Saturn* in the same Aspect, the *Moon* defluxes from *Saturns* Body, and hastens to the benevolent Trine of *Jove*, as above express'd.

This is a very calm Position of the Heavens, and promises a grateful, quiet, and hopeful Season, according to the Stream of natural Causes. The last Year we had the favourable Trine of the two Superiors, *Saturn* and *Jupiter* from *Virgo* and *Capricorn*, earthy Signs twice repeated, their hopeful Effects went on with much deliberation, *Jupiter* having met with the Conjunction and Square of *Mars*, and *Mars* not only with the Trine, but the Square and Conjunction of *Saturn*, which Aspects might in some measure retard the hopeful Effects of the former; However some considerable Matters may be now expected (if not already brook out). 'Tis Time is the Parent of Truth, and must Consummate all things, as being also the measure of all our Actions.

I conclude about this time we begin (at least) to have a better understanding of some late Proceedings, and yet more new Matter is discovered, and falls under debate for a time; now the latter end of this very Month should produce pleasing News, from Places and Countries far Remote abroad, as well as among our selves in England, *Jove* I say is happily plac'd upon the Ascendant, in the Sign of Justice, and the *Moon* ha-

sting

COLEY, 1697. His Astrological Observations.

ling to his True *Aspirant*, *Haley* tells us, such a Position signifies the General Affairs of Noble Men, Judges, Counsellors at Law, and Religious Men should succeed now in their Endeavours much better then formerly, *Consideratis Considerandis*. That the King should equally distribute Justice, and Govern both by Law and Reason, and not in the least to the Subjects Detriment, &c. But Manifest himself a Just Prince; and Consequently here seems an Appearance of much Tranquillity and Peace in all His Majesty's Dominions; also many deliberate Councils on Foot, to the great Satisfaction of the Common People and others, to ease their Burthens, and do them Justice, according to their several Capacities and Circumstances. This Judgement is Natural from the aforesaid Position. I farther add, that about this time, many Languishing Persons that have laboured under strong Fears and Perplexities of Spirits, begin also to see a very fair Prospect of a happy Issue to their tedious Vexations, and present Troubles; for now, I hope we are in (or near) a happy Peace with all the World, and now also, I doubt not but we are also free from the Danger of New-Plots and Designs, wherewith, for some Years past we have been strangely Disturb'd and Affrighted.

To Conclude this Quarter I may say. —

What *Sor* would go Plot, when his Lot is a Rope,
What *Fop's* will be *Tolls*, and *Slaves* unto *Knaves*, for *Hope*,
The *Wife* that wear *Eyes*, will despise such *Temptations*,
And learn to Discern, their own Peace must cease with the *No*.
Quiet, is *Dier*, those that Try it shall find [none].
More sound, then is found in a Crown by a restless Mind.

IV. Of the Summer Quarter, or Sun in Cancer (according to vulgar Appearance) which this Year begins June the 10th. near 9 afternoon, at which time we have the second Face of Scorpio upon the Midheaven, and about 11 d. of ♊, Capricorn Ascending, &c. Δ h δ . Δ ψ δ . δ \odot δ . δ \square ψ ad δ ψ .

THIS is also a Calm Position of Heaven, and promises suitable Effects on Earth. Could we be content and quiet within our selves, we should be of all Nations the most Happy; If Sickniess or Mortality approach (as some are pleased to threaten)

COLEY, 1697. *His Astrological Observations.*

ten) Let not that molest us, but rather let us submit to the Divine Hand of Providence. There are many things which we know to be, and yet we know nothing at all of what they are: Is it not the *Mind* that Moves us and Restrains us? but what that *Ruling Power* is, we do no more truly understand, than where it is: one will have it to be a Spirit, another will have it to be a *Divine Power*, some only a Subtil Air, others an *Incorporal-being*, and some again will have it to be *Blood* and *Heat*.— But to speak of God without Nature, is more then we can do. And to speak of Nature without God, is very improper.

Now what can be more worthy our Admiration than the *Sun* and *Stars* in their Courses and Glory? and yet so long as Nature goes on in the ordinary Way, there is very little Notice taken of them, but when any thing falls out beyond Expectation or Custom, what a Gazing, Pointing and Questioning, there is about it? Every *Meteor* sets People upon the Query, to know the meaning of it, and what it portends also, whether it be a *Star* or a *Prodigy*.— We are naturally too apt to think our selves miserable, and those thoughts often make us so.

Many Breaches are lately healed, and fairly compos'd amongst us, so that I hope we may by this time be able to say by Experience, there is still Balm in Gilead. The Configurations of the *Planets* this *Quarter*, are very significant, and they will certainly have as Notable Effects; I fear towards the latter End hereof, the Industrious Merchants may hear ill News from Sea, and the Common People will be too subject to Complain, some of lean Crops, and Scarcity of many Commodities of great Use to Mankind. In fine, some very strange Acts committed in several Countries of *Europe*, some Shipwracks, and other Disasters of that kind. But I Conclude with *Horace*.

*What's this hidden, Time will bring to Light,
And that will vanish which now Shines so Bright.*

To Conclude this Quarter, —

We see 'tis too frequent amongst many People, and I may say, Generally all, more or less, let their present State in the World be what it will, there's still something or other in it, that makes their Life wearisome.

V. Of

COLEY, 1697. *His Astrological Observations.*

V. Of the Autumnal Quarter, which takes beginning September the 12th. at a Quarter past 10 in the Morning; at which time about 2 Degrees of Virgo culminates, and about the midst of Scorpio Ascends, the Moon separates from the Trine of Mars and Venus, and hasts to the Sextile of Mercury, and ☐ of the ☉, who is at this time in exact Trine to ♄. — &c.

Here's no great Matters may be expected from this Ingress, but a moderate calm time in General; the Year itself should be Seasonable, and no less Healthful, whatever may be suggested by the most Critical Persons of our Age; and as for the Rise and Fall of Commodities of all kinds, they need consult no better, nor no other, than Mr. Woughton's Weekly Paper of Husbandry and Trade, to which I refer the Curious in such Matters. The Actions of this Quarter, begin with very fair Pretences, and the People are now in expectation of very hopeful Proceedings, for the General Advantage of the whole Nation, and here seems little or no Contradiction during this Quarter, in the great Affairs of the Publique; but very mature Councils are continued, to the General Satisfaction of all Loyal Hearts, and all True-bred English-men; yet in the midst of our greatest Hopes, we may expect to hear of the Discontented Tongues or Pens of some hot Brain'd Spirits, that delight to bring themselves into Trouble, who might otherwise live at Peace. Let all such Persons consider, that the Mischief which they design to Expel by Imprudent Revenge, will undoubtedly return upon their own Heads, with Usury: And Generally it so happens amongst us, that after a Shower of Wrath hath been Powred out, immediately follows a Flood of Grief: It is therefore the sweetest Revenge (if possible) to forget an Injury, whether real or supposed — And now we all see, that the Effects of the last Great Conjunction, and Appearance of Comets have been very considerable for several years past, and the same Influences will Operate yet more or less, till the next Conjunction of the Superiors in Aries, An. 1700.

But Philosophy — renders some men so bold,
They'r not affrighted, when they do behold —
The Sun and Stars, so variously appear,
In all the different Seasons of the Year.

COLEY, 1697. His Astrological Observations.

VI. A Table shewing the Rising, Southing, and Setting of the Pleiades, or Seven Stars, for every fifth day throughout the Year: Of great use for finding the Hour of the Night, &c.

The use of this and the next Table, follows them.

I. JANUARY.				FEBRUARY.				MARCH.			
m.	Rise.	South.	Setting.	Rise.	South.	Set.		Rise.	South.	Set.

COLEY, 1697. His Astrological Observations.

VIII. The Explanation and Use of the precedent Tables of the Fixed Stars.

THE Table of the *Pleiades* or *Seven Stars*, contains ten Columns, the first, towards the left hand, expresses every 5th day of each Month, as 1, 6, 11, 16, 21, 26. The second shews their Rising in Hours and Minutes: The third their South- ing: The fourth their Setting; as is plain by the very Titles. And observe, That the Letter (a) denotes after Noon, and (b) before Noon; and so in the fifth, sixth, and seventh Column the same, as also the eighth, ninth, and tenth is continued the Rising, South- ing, and Setting of the *Pleiades*, for every fifth day throughout the Year, as is plain and intelligible to the meanest Capacity. As for Example: *Viz.*

Suppose, I desire to know the Rising, South- ing, and Setting of the *Seven Stars*, *January* the 21st. I find by the Table, they Rise 16' after 10 before Noon, South 32' past 6 after Noon, and Set 48' past 2 in the Morning. And so against the 6th. of *August* they Rise 29' past 9 after Noon, or at Night, they South 45' past 5 in the Morning, (as the Letter M denotes) and they Set 1' past 2 after Noon, *Et sic in alijs*. In the second Table of *Fixed Stars*, there are seven Columns (1.) The Names of the Stars. (2.) Their Rising. (3.) Their South- ing. (4.) Their Setting, either before or after the *Pleiades*. (5.) Their Latitude. (6.) Their Magnitude. (7.) Their Natures; as the Titles direct. In the Columns of Rising, South- ing, and Setting, is express'd how many Hours they Rise, South, and Set, either before or after the *Seven Stars*, as the Letters (a) and (b) denotes. Example: The *Pleiades* South the 21st of *January*, 32' past 6 at Night; and in the second Tables, I find that *Syrus*, or the great Dog- star Souths 3h. 3' after; which added to 6 h. 32', the Sum is 9 h. 35', or 35' past 9 at Night; at which time *Syrus* is upon the Meridian with 39 d. 30' of South Latitude: He is a Star of the first Magnitude, and said to be of the nature of *Jupiter* and *Mars*. The same is to be understood of all the rest: *Usus promptus facit*.

IX. Of the Eclipses of this present Year, 1697.

THIS Year the Luminaries will be Eclipsed no less than three times; twice of the Moon, and once of the Sun; but only one of the Moon visible in our Hemisphere, which take as follows.

COLEY, 1697. His Astrological Observations.

loweth, The first will be of the *Sun*, *May* the 11th. day, about one in the Morning, 'tis Celebrated in the beginning of the *Sign Taurus*, and Invisible to us ; at the same time *Jove* is with the *Sun*, who is separating from the Quadrant of *Saturn*. The second will be a *Lunar-Deliquium*, *May* 26th. about 8 in the Morning, in the midst of the *Sign Scorpio*, the Moon being then under our *Horizon*, 'twill be to us Invisible. The third and last will be of the *Moon*, and therefore a Lunar Defect, *October* the 19th. The beginning at 7 h. 45', the middle at 8 h. 7', and the end at 9 h. 29' P. M. The *Digits* Eclips'd 7 h. 29' on the North, or Upper side, according to the Accurate Tables of my Friend now waiting for a happy Birth, and to be made publick with all Convenient speed. *Eclipses* have doubtless their Events or Effects, both upon Man and Beast, and never signify any thing of Good : But those which are Invisible to a Country or Kingdom, are less Powerful and Significant. Let the Curious observe what Events succeed these, of which no more need be said at this time, or in this place.

The Epilogue, or Conclusion.

FAREWELL my Little Book, once more Adieu ;
Go please thy Friends, this charge I give to you :
Throughout Great Britain boldly shew thy Face ;
With Speed, most kindly visit every Place.
Fear not, tho' Mome and Zollus 'gainst thee Prate,
The Best of Books too often have such Fate ;
But tell such Criticks thou dost not regard
Their Vaporous Teeth, let them Bite ne're so hard.
Do thou Proclaim thine Errands, that all may see,
What from Uraniah is Declar'd by thee,
When the Sun and Moon, with all the wandring Stars,
In Friendship joyn, or when they fall at Fairs ;
Their Morions, Risings, Culminations all,
Their Settings too, as through the Year they Fall ;
And how the Heavenly Influx do forthshow,
Their mighty Actions, yet carry'd on below,
Now if Success on thy side be not Bad,
Thou mayst appear the next Year better Clad.
All I Request the Reader is this Kindness,
Correct my Faults, since they Admit no

ADVERTISEMENT.

MR. Robert Bateman's Famous Spirit of Scurvy-Grass, both Plain and Golden, which have perform'd so many Eminent Cures in the Dropsie, Scurvy, and most other Distempers are no where prepared but at the House he formerly dwelt in in St. Paul's-Chain, London, near Doctors-Commons; sold there by Mr. John Hooker, and by none but by such as have it from thence; all others sold in his Name are Counterfeits. Beware thereof. Price One Shilling the Bottle. Sealed with the Old Seal. The said Mr. John Hooker sells the Grand Balsamick, or Health procuring Pills, Approved by the most Eminent Physicians in England, to be one of the safest and most pleasant Purgers in the World. Their Vertues are all at large in a Printed Book given with them. Price One Shilling the Box.

Bushworth's Loxenges, Famous for the Cure of Coughs, Catarrhs and Hoarseness, being also a great Cordial and Sovereign Preservative against all contagious Distempers, malignant Air and Unwholesome Weather, well approved of by the Chief Physicians of the Colledge, to whom the true Receipt has been communicated by the Publisher hereof, and are now rightly prepared only by James Shipton Apothecary, at the Crown in Hatton Garden.

MR. Porragies Spirit of Scurvy-Grass, both Plain and Purging at 6 d. a Glass, (for such as will not go to the price of the former) which since the decease of the Doctor and his Son, made and sold by his Daughter, (who prepared it several Years for her Brother's Life-time) she now lives in Leather-Lane, at Mr. Turbins, a Carpenter, over against the Chequer Back-gate where the said Spirit of Scurvy-Grass is sold, and at many other places in the City. Whose Vertues are the same in all respects with other Mens, as is express'd at large in the Bill given for its Use. The Bottles are sealed with the Three Cross-Crosslets and Chequer and these Spirits are the same as have been prepared for many Years past and well approved for its excellent Vertues throughout the Nation.

MR. John Ruffe, Physician and Oculist, his Spirit of Scurvy-Grass, both Plain and Golden, Purging, is the most strongest, and powerful that is sold. Those that Buy it to return it again without loss, if it prove not so; it is his for the Closter of any Physician and is most Admirable in the Scurvy, Dropsie, Gout, and most other Diseases. Also Loxenges for Colds, Coughs, and Consumptions, with his Famous Powder that kills all sorts of Worms. Sold at his House, at the Two New Mills, against Greenwich in Kent. Each sold for One Shilling.

MR. William Royle, the Famous English Operator in Glass, that lately lived in the Swan Yard on Ludgate-Hill, is now removed to the sign of the Golden Griffin in St. James Lane, near Chancery, where he maketh all sorts of Artificial Eyes, exactly like the Nature.

A New Idea of Geography and Navigation: Containing the true Rales for finding the Lat and Longitude of any Place, by observation of the Sun, Moon, and Stars, with all other Instruments necessary in Navigation. An excellent Piece, the like not hitherto extant, by Samuel Gordon, Master of the Mathematical School at Christ's Hospital. Printed for Christopher Dutton, at the Flower-de-Luce in Little Britain, and sold by several other Booksellers.
